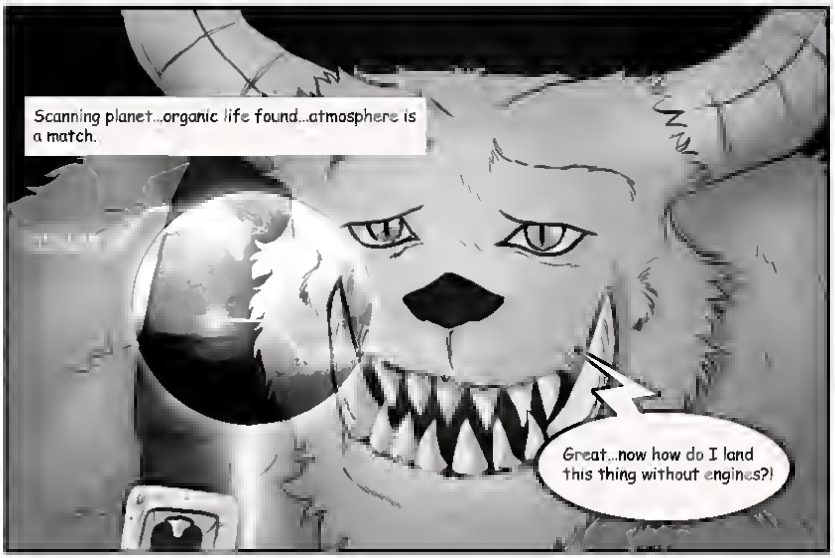
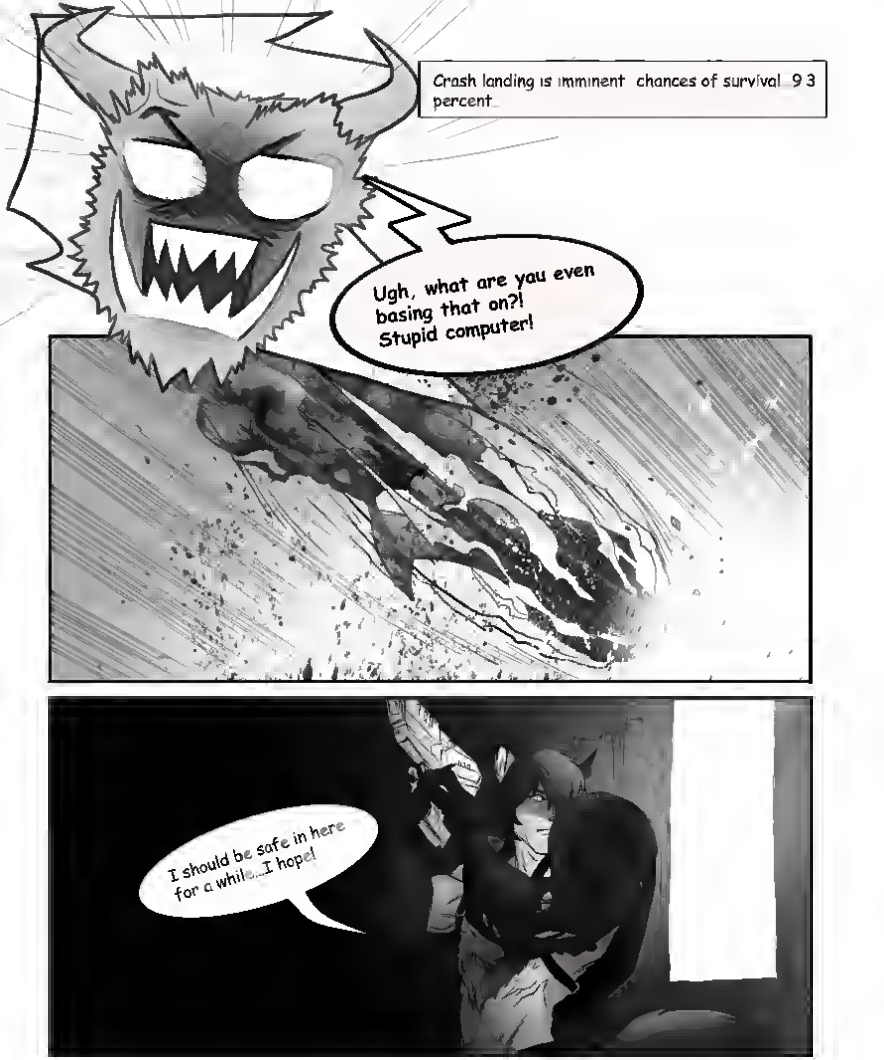
Engines are now offline...warp drive no longer functional.
Yeah, yeah, shut up already! I hear ya!



Scanning planet...organic life found...atmosphere is a match.
Great...now how do I land this thing without engines?!



Crash landing is imminent chances of survival 9 3 percent
Ugh, what are you even basing that on?! Stupid computer!
I should be safe in here for a while...I hope!

Huh?! What the hell is that?!
Oh shit! Please tell me it's not that freakin' super bomb!"

Yyyeah, this might hurt a bit!
CRASH

SPLOT
Ugh! Heh, clean up, aisle 7!
Kaaaaaa

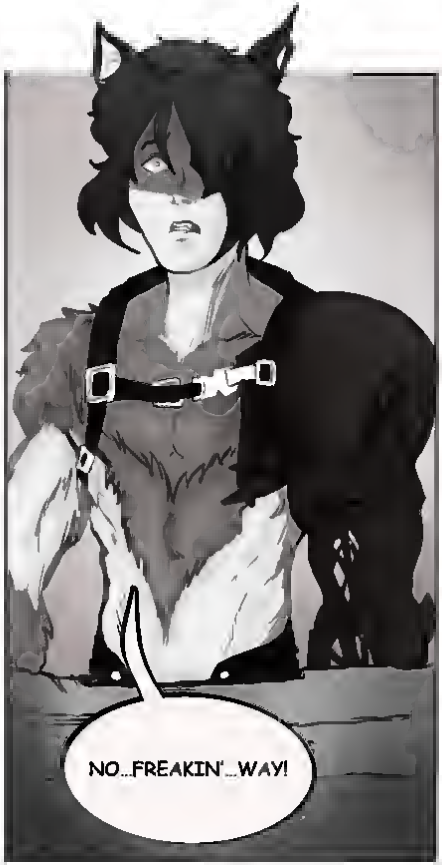
Well, at least it's not a bomb... but I don't recognize that style of ship. It's gotta be underworld!

Hmm, not one of my best landings but I'll take it
What the hell is that thing? Never seen a creature like that before
Oh well, may as well kill it... just to be safe!

Bratatatatataaataaa

You REALLY shouldn't've done that!
What the...it's still alive?!

WOOOOOOOOOSSHHH



NO...FREAKIN'...WAY!

Crap!
What the hell is that thing?!
Hey hold on a sec big guy! I only shot to get your attention! We're on the same side!

Oh yeah?
And what side is that?
We both hate the guys that just shot you!
That's what side

So what are you anyway? Some kinda super-ogre?
Heh, somethin' like that, kid... I'm not from this planet."
So what's your story? Is everyone here half robot?
No...actually, I'm the only cyborg...as far as I know."

Maze looks out the window now...checking for enemies.
Of course, I wasn't born like this.
So how'd it happen?"
A few years back, me and my mom were just trying to avoid the war...the rest of our family were already dead

But you can only hide for so long before they find you...
My mom tried to draw them away to save me... she sacrificed herself for me!

I watched them kill my mom!
And something inside me snapped

That's tough, I know the feeling... everyone I cared about is dead
Yeah, well I couldn't just watch I ran out there, and used a pocket knife to stab one of them in the neck!
Instead of just shooting me, they beat me, ripped off my arm and legs...bashed half my face in and cut off one of my ears...then left me there, barely alive to suffer
Wow, harsh!! So how did you get all this done?

Sooo, what, like an angel or something?"
Heh, someone was watching over me that day
Once the troops were gone the Doc came out to get me later he told me he was only able to save me cause I was still alive
Pffft! Angel?
No like an actual person...
a scientist named Doc Abel

And the only way he could save me was to turn me into this!
So, why go through all that trouble to save someone he didn't even know?
He said he saw something in me that day...and that he believed I could help put an end to this war."

What's this war about anyway? How did it start?
Well...basically, the story goes like this...three hundred and eighty-yyyy... seven years ago...give or take...
The underworlder's grew tired of living underground, so with weapons made from a special metal, they invaded the surface world"

Our weapons were no match for theirs
Eventually, we got our hands on some of those weapons but the species of the surface world refused to work together...and still fought each other!
Now that we have these weapons, the Dyzium stuff isn't as useful...but to this day, we're losing this war cause our races can't get along...a bunch have even defected to the other side!
